

THE BELFAST RISE

Standing at 37.5m high The Belfast Rise is Northern Ireland's tallest public artwork and is visible to thousands of people daily in its central location.

Weighing over 40 tonnes 'The Belfast Rise' has been protected and decorated with Colourgalv, the component parts have maintenance free protection for decades. The textured white coating chosen by the designers from Highland's extensive range of colours coats the 4000 parts, (1600 discs 400mm x 8mm and 2400 poles, average length 2m) for a robust but aesthetically appealing finish and allows for enhanced night illumination.
